

NURSING OPTIONS in an IEP

- Mar of 2021: Nurses' check box on the Supplementary Aids and Supports page was removed.
 - Nurses must now document on the **(PLAAFP) Present Level of Academic Achievement and Functional Performance** page, or under **Programs and Services** page.
1. **PLAAFP** – document services here listing what medical services are needed for the student to aid them in accessing their education. There is no need to check the goal box unless the nurse is working on a medical skill with the student to increase their ability to do the task independently and it is needed to access education.

2. **PROGRAMS and SERVICES** – document services here for students receiving direct medical services that only a nurse can perform, i.e., ventilation, catheterization, trach care, etc., which requires students to be removed from their instructional day. Nurses need to document time (in minutes), frequency (per day, per week, per month) and location where this service will occur.
